Real HELP. Real ANSWERS.

WOMEN'S RESOURCE CENTER
Pregnancy Solutions

Dear Friend,

Did you know that nearly 1 in 4 pregnancies (22 Percent) end in abortion? And that 51 percent of the abortions performed are on women less than 25 years of age? Or that approximately 1/3 of American women have had an abortion by age 45? And of those women, most suffer from a form of PTSD that causes them to feel guilt, shame, anger, depression and can cause them to hurt themselves? In fact, many brave women are now coming forward in ever greater numbers to speak out about how abortion was not an act of empowerment but the result of abandonment, betrayal, and desperation, and how it has negatively affected their lives.

The Women's Resource Center offers help to these women and to the women who are pregnant and are looking for support in their time of need. We want to be there for them, to help them through their pregnancies, postpartum stresses and, for those women who have had abortions, we want to to offer them counseling so they can find peace.

"How do we persuade a woman not to have an abortion? As always, we must persuade her with love... And we remind ourselves that love means to be willing to give until it hurts." -Mother Teresa

You can help us save women from desperation and help save their unborn children. Even a small contribution of funds, time and sponsorship can make a huge difference. Enclosed is additional information about our Women's clinic and the services that we provide. We look forward to partnering with you in the future.

Best Regards,
Tiffany Bell

Executive Director

WOMEN'S RESOURCE CENTER

WELL WOMAN
Pregnancy Test & Counseling Services

We offer a highly reliable pregnancy test that detects hCG in urine. Since the test is accurate 7-10 after conception, it can be run as soon as a woman misses her menstrual cycle.

Clients meet with a caring Peer Counselor who will offer emotional support, discuss options, and present facts to empower women to make positive and healthy choices for them and their baby.

Over the past 6 years, an average of 74% of our clients have changed their minds and chose life for their baby after receiving counseling and an ultrasound.

POST-ABORTION SUPPORT

Helping Women Heal

Women who have experienced abortion are often left with emotional scars. We offer a 10-week study that allows them to process these emotions and experience a deeper healing.

Clients are given a safe place to take this journey with an instructor who offers emotional support. The main goals of the journey include helping women to :

- *Process their grief*
- *Understand the emotional responses resulting from that grief*
- *"Know" their child in order to say "goodbye for now"*
- *Learning to move past their grief by finding life lessons through their journey*
- *Find a new life of color, freedom, and joy*

Studies show that *50* percent of abortive women express negative feelings, and up to *10* percent are classified as having developed "serious psychiatric complications"... but there is HOPE.
